Installation Tips

1. Highly recommended to seal the adjustable hole with silicon glue (#704 preferred) after adjusting the driver's output current. Torsion should be taken off with proper strength to avoid permanent damage to the potentiometer inside.
2. Remove the out screw for Hi-pot test, and fasten it back and connect to the metal case appropriately after it done to maintain the 12kV/6kV surge protection per IEC 50598-1-10.2, refer to below:
3. Dimming leads should be capped if not in use to avoid dimming circuit damage caused by external signals.
