◆ Description

FMS-80-350 N-S LD-F is an 80W non-Isolated design constant current LED driver that operates from 198-264Vac input with 200 to 350mA output current and a forward voltage range from 120 to 350Vdc. The output current is adjustable by DIP Switch. With it's compact dimensions from 280*30*21 mm. It is easy to integrate in linear light products. To ensure trouble-free operation, protection is provided against output short circuit, over voltage and over temperature.
